THE EFFECT OF ADDITION EXTRACT OF NONI ON FEED PELLETS TO THE GROWTH DUMBO CATFISH (*Clarias gariepinus*)

*By Aulia Nihayatun Ni’mah*

**ABSTRACT**

The purpose of this study was to assess the effect of extracts of noni on feed pellets to the growth of Dumbo catfish (*Clarias gariepinus*). This study uses a completely randomized design (CRD) with four treatments and six replications. The treatment tested is Treatment A: feed pellets without the addition of noni extract; Treatment B: feed pellet with the addition of noni extract 10 ml/kg; Treatment C: feed pellet with the addition of noni extract 20 ml/kg; Treatment D: feed pellet with the addition of noni extract 30 ml/kg. Variety Fingerprint Analysis Result showed that the addition of the feed pellets noni extract has no effect on the growth of dumbo catfish (*Clarias gariepinus*).

**Keywords:** *Clarias gariepinus*, noni extract, growth
